Leadership Development

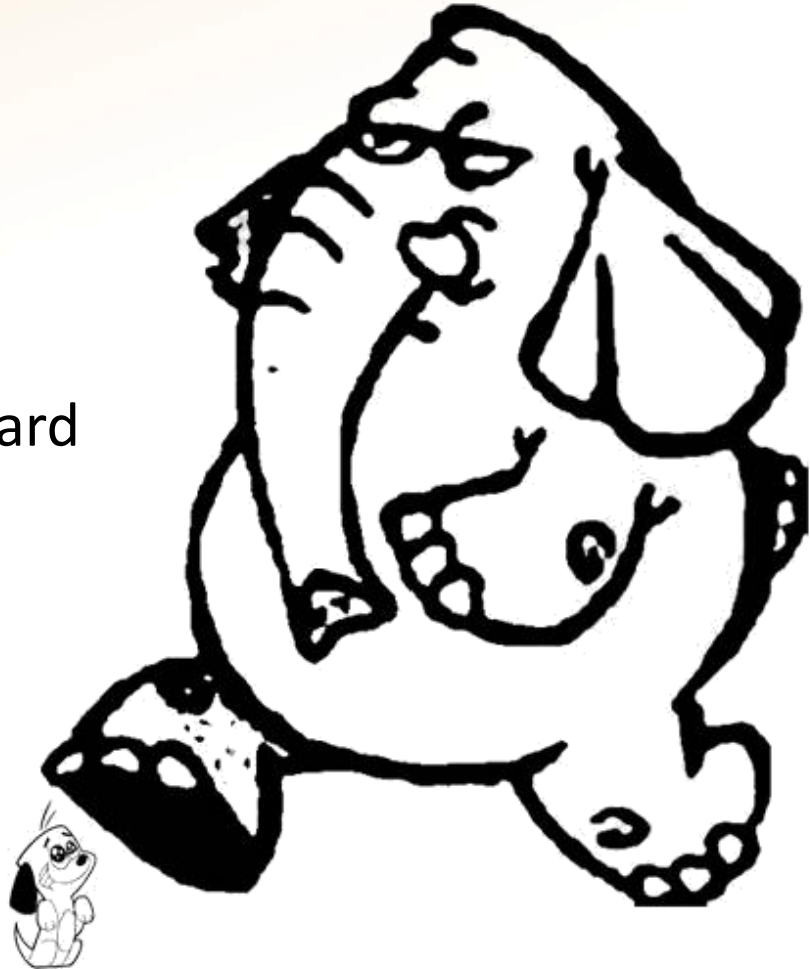

Leadership: The positive impact that a person has on other people's lives...but, where does it start?

Decision making

Risk is an inherent part of every decision we make. It is just how we see it and how we manage it that it may even become a tool.

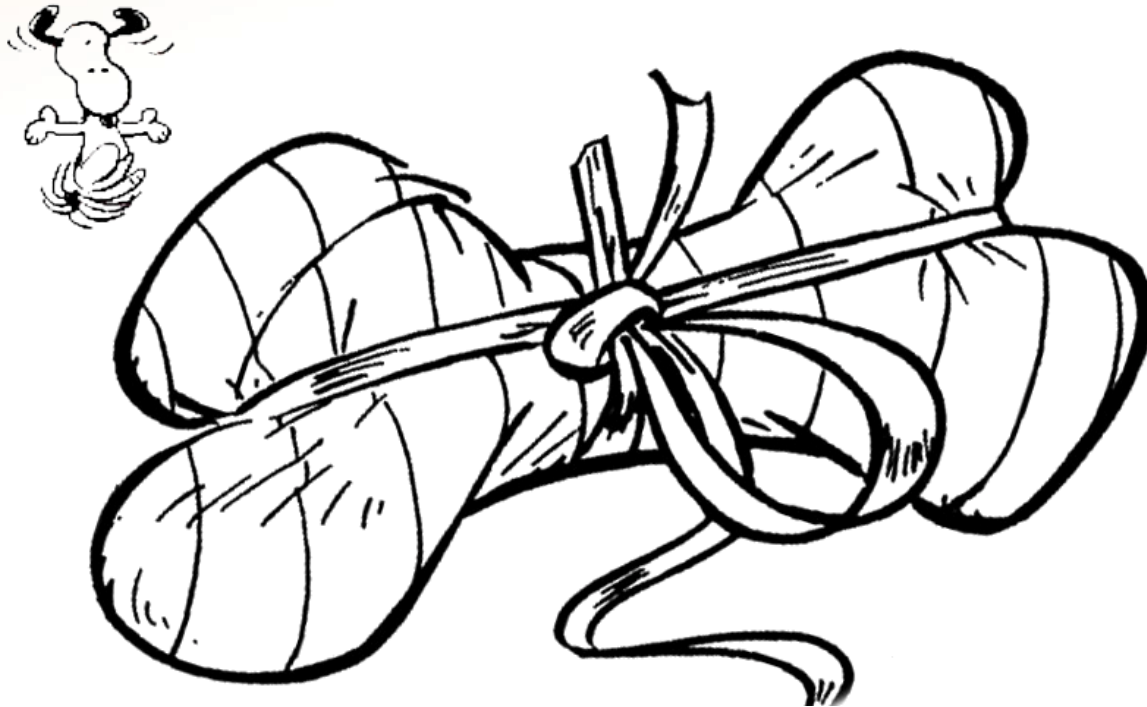

Negative Risk:

- Exposure to danger or hazard

Positive Risk:

Size of the opportunity + (abilities + expertise) - (fear, self confidence, discredit or comfort zone) = success and risk capitalization

Dream

Everything starts
with a DREAM...

Your own DREAM.

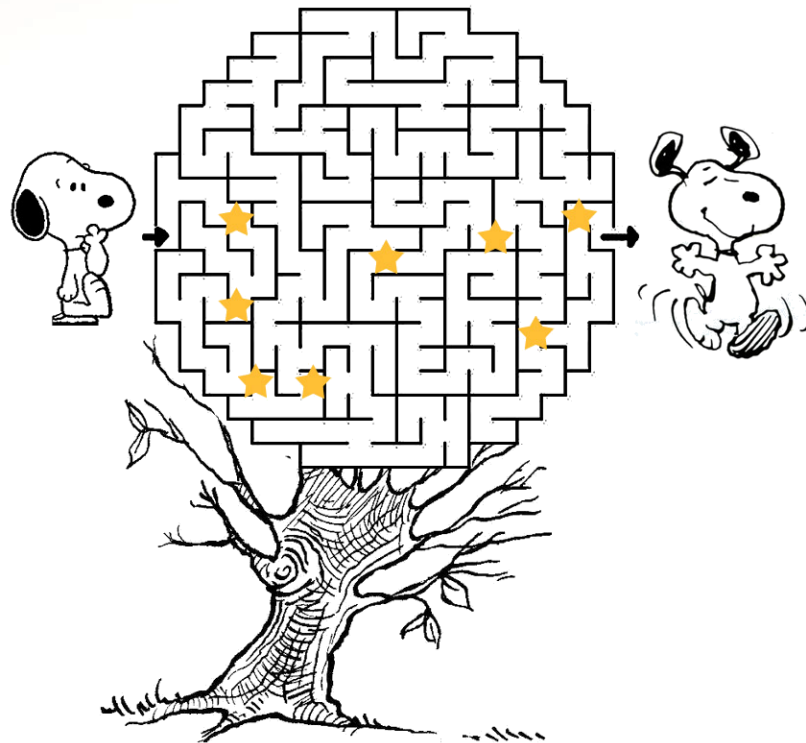

Make it come true

This dream is your goal,
you are the engine...

Only you can make it happen.

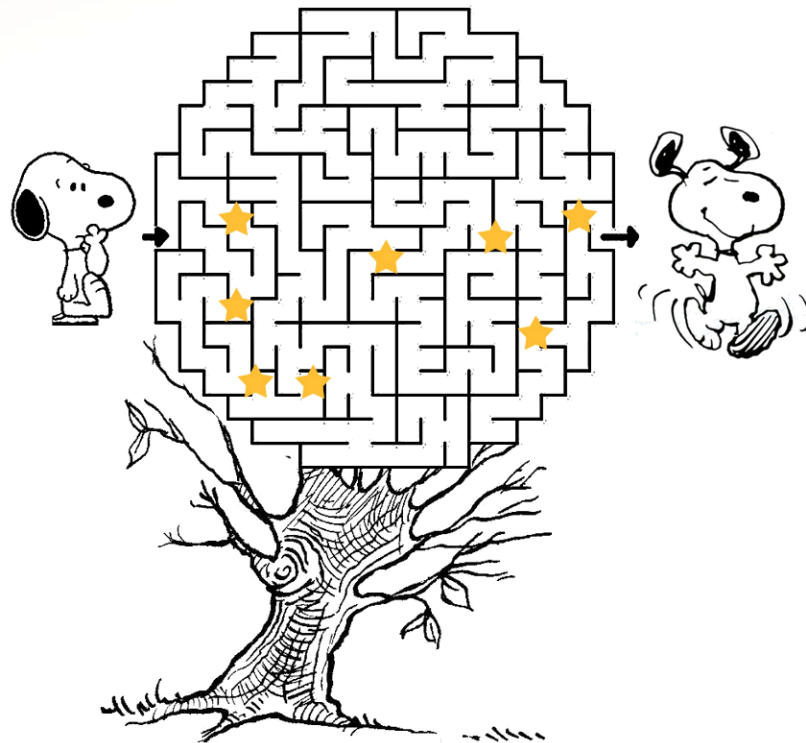

Make a decision

"To reach our goal, we have to take many paths, sometimes we go wrong, but there is no problem, all we have to do is learn and fix it."

When to take the risk?

1. When you do not have a clear career path.
2. When you have reached the “ceiling in your company”
3. When there is no fit with the Company
4. When your work is clearly not appreciated

Power

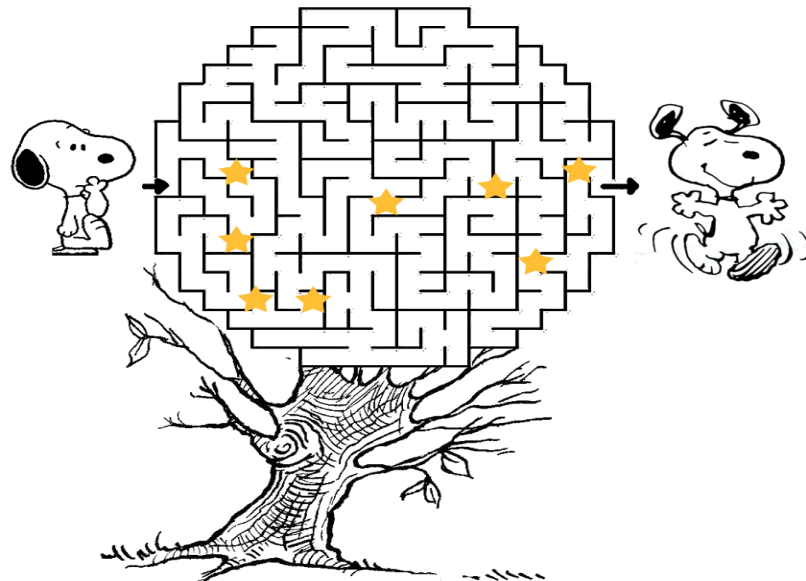

“The greatest power a woman possesses
is the power to choose”

J. Martin Kohe

The positives of staying with your current employer

1. It is more powerful to be an insider than an outsider
2. You have a reputation and a history of achievements that you can build upon
3. Time fosters alliances and loyalty (in times of trouble loyalty is a big asset)
4. You have a valuable network, advocates and mentors that will open new possibilities when needed.

Reach your full potential

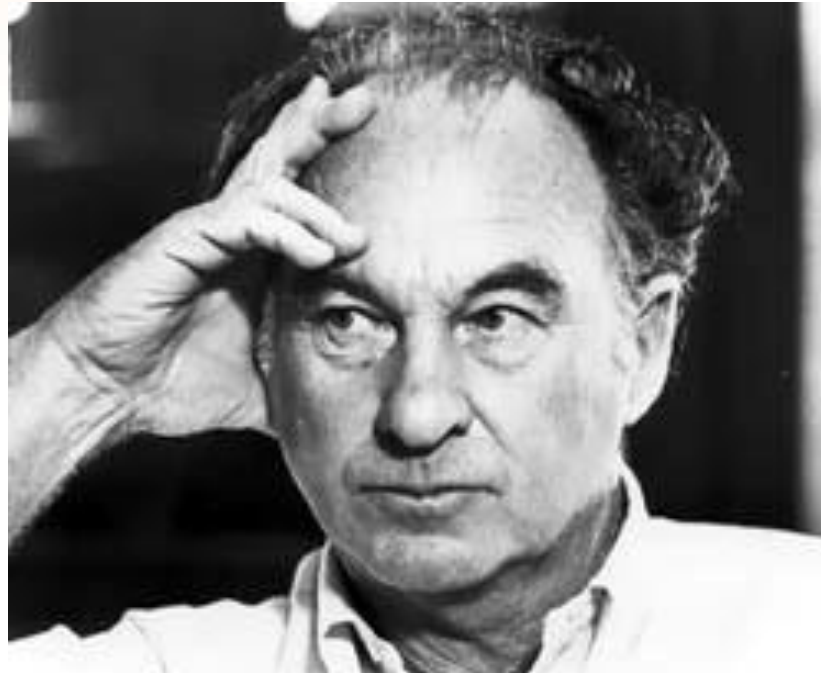

"We fail to see that we control our own destiny;
make ourselves do whatever is possible;
make ourselves become whatever we long to be"

Orison Swett Marden

Choice

"You only need to choose...
then keep choosing as many times as necessary.
That is all you need to do. And It is certainly something you can do.
Then as you continue to choose, everything is yours"

Vernon Howard.

Always there

Risk management is an integral part in your path to achieve your dreams and your own definition of success.
